1. Nature of operations and going concern

Silver One Resources Inc. (the “Company” or "Silver One") was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on June 8, 2007.

The Company’s principal activities include the acquisition, exploration and development of mineral properties. The Company owns a 100% interest in the Candelaria silver project in Nevada (the “Candelaria Project” or “Candelaria”), a 100% interest in the Phoenix Silver property in Arizona (“Phoenix Silver Property” or “Phoenix Silver”), and a 100% interest in the Cherokee project in Nevada (“Cherokee Project” or “Cherokee”).

These consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for the next twelve months. As at September 30, 2026, the Company had an accumulated deficit of $30,349,552 and expects to incur further losses in the development of the business. As a result, the Company may be unable to realize its assets and discharge its liabilities in the normal course of business. The Company’s ability to continue as a going concern is dependant on its ability to obtain necessary financing to meet its corporate and deferred exploration expenditures and discharge its liabilities in the normal course of business. Although the Company has been successful in obtaining financing in the past, there can be no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. The Company has adequate financial resources for the next twelve months with working capital of $29,566,373.

Should the Company be unable to continue as a going concern, asset realization values may be substantially different from their carrying values. These consolidated financial statements do not give effect to adjustments that would be necessary to carrying values and the classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material.

Silver One is a public company listed on the TSX Venture Exchange (“TSX-V”) under the symbol “SVE”, on the OTCQX Marketplace under the symbol “SLVRF”, and on the Frankfurt Stock Exchange under the symbol “BRK1”.

The Company’s corporate office is located at Suite 1000, 1055 W Hastings St., Vancouver, BC Canada, V6E 2E9.

2. Basis of preparation

Statement of compliance and functional currency

These condensed interim consolidated financial statements have been presented in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (“IASB’), applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting.*

These consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments that are measured at fair value. These condensed interim consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company’s Canadian entity. The functional currency of the Company’s foreign subsidiary is US dollars. The functional currency of an entity is translated into the presentation currency using the period-end rates for assets and liabilities while the operations and cash flows are translated using average rates of exchange. Exchange adjustments arising when net assets and profit or loss are translated into the presentation currency are taken into a separate component of equity and reported in other comprehensive income or loss.

Transactions in currencies other than the functional currency of an entity are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting date, monetary assets and liabilities are translated using the period end foreign exchange rate. Non-monetary assets and liabilities are translated using the historical rate on the date of the transaction. Non-monetary assets and liabilities stated at fair value are translated using the historical rate on the date that the fair value was determined. All gains and losses on translation of these foreign currency transactions are included in profit or loss.

The accounts of the subsidiary are prepared for the same reporting period as the parent company, using consistent accounting policies. All intercompany transactions, balances, income and expenses are eliminated in full upon consolidation.

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates. The Company's critical accounting estimates and judgments applied in the preparation of these condensed interim financial statements are consistent with those reported in our 2024 annual financial statements.

These condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issuance on November 10, 2026.

3. Material accounting policies

These condensed interim consolidated financial statements have been prepared on a basis consistent with the material accounting policies disclosed in the annual financial statements for the year ended December 31, 2025. Accordingly, they should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2025.

Accounting standards issued but not yet effective
The following new standard has been issued but not yet applied:

In April 2024, the IASB issued IFRS 18, *Presentation and Disclosure of Financial Statements* ("IFRS 18"), which replaces IAS 1, Presentation of Financial Statements. IFRS 18 introduces a specified structure for the income statement by requiring income and expenses to be presented into the three defined categories of operating, investing and financing, and by specifying certain defined totals and subtotals. Where company-specific measures related to the income statement are provided, IFRS 18 requires companies to disclose explanations around these measures, which are referred to as management-defined performance measures. IFRS 18 also provides additional guidance on principles of aggregation and disaggregation which apply to the primary financial statements and the notes. IFRS 18 will not affect the recognition and measurement of items in the financial statements, nor will it affect which items are classified in other comprehensive income and how these items are classified. The standard is effective for reporting periods beginning on or after January 1, 2027, including for interim financial statements. Retrospective application is required, and early application is permitted. We are currently assessing the effect of this new standard on our financial statements.

As at September 30, 2026, there are no other IFRS or IFRIC interpretations with future effective dates that are expected to have a material impact on the Company.

4. Short-term investments

Short-term investments of $20,917,324 (December 31, 2025 - $nil) include highly liquid, redeemable GIC investments in an active market with original maturities of one year or less.

Candelaria Project Acquisition

On January 16, 2017, the Company entered into an option agreement (the "Option Agreement") with a subsidiary of SSR Mining Inc. ("SSR"), to acquire a 100% interest in the Candelaria Project, and on May 31, 2023, the Company assumed the reclamation bond on the property in the amount of US$ 2,491,757, and acquired a 100% interest in the Candelaria Project without a royalty paid to SSR. As at September 30, 2026, the reclamation bonds of US$ 2,491,757 and US$15,243 together were recognized on the statement of financial position at $3,571,775 (December 31, 2025 - $3,439,203).

7. Mineral properties (continued)

Candelaria Project Acquisition (continued)
The property is subject to a historic 3% net smelter return royalty payable to Teck Resources USA Inc. on production from a certain claims group of the property, and a charge of $0.01 per ton payable for waste rock dumped on certain claims. The royalty claims intersect the northern tip of the Diablo pit and may contain a small portion of the existing in-ground resource.

Additionally, Silver One will assume an obligation to pay US$1,000,000 upon Candelaria achieving commercial production of not less than 2,500,000 ounces of silver per annum ("Production Payment") to Maverix Metals Inc. ("Maverix", which was acquired by Triple Flag Precious Metals Corp. in January 2023). In January 2020, Maverix agreed to amend the Production Payment so that Silver One may satisfy it with US$500,000 in cash and $500,000 in shares of Silver One, payable on the first anniversary after commencement of commercial production at Candelaria.

Additional Candelaria claims acquired
In November 2019, the Company acquired three patented claims, located within the Company's claims. The claims are subject to a 2% NSR that can be purchased for US$50,000 plus US$5,000 in Silver One's shares issued at market price on the date of the issuance.

Phoenix Silver Acquisition
On February 4, 2020 (the "Effective Date"), the Company entered into an agreement (the "Phoenix Silver Agreement") with Granite-Solid LLC (the "Optionor") whereby the Company had the option to acquire a 100% interest in the Phoenix Silver Property. The Phoenix Silver Property consists of 86 unpatented lode claims and 2 unpatented placer claims, located in Gila County, Arizona.

On February 6, 2024, the Company exercised its option to acquire a 100% interest in the Phoenix Silver Project.

The Phoenix Silver Property is subject to an underlying 2% Net Smelter Royalty ("NSR") on the claims acquired not staked by the Company, payable to the original prospectors of the project. Each 1% NSR may be purchased for US$500,000 resulting in a total of US$1,000,000 for the entire underlying NSR.

Signing of lease/purchase agreement on five patented claims at the Cherokee Project
In July 2020, the Company earned 100% interest in five patented claims at its Cherokee Project. These patents lie within the Company's Cherokee claim holdings in Lincoln City located in eastern Nevada.

During a 10-year period commencing July 18, 2018, Castelton Park LLC, the original property vendor, is entitled to an additional payment of US$100,000 for every 7.5 million silver equivalent ounces of mineral resources calculated on the property and reported in a technical report prepared in accordance with NI43-101, subject to a maximum of US$1,000,000. The 10-year term ends on July 18, 2028.

Accounts payable include amounts owing for consulting, exploration, and general corporate expenditures. Accrued liabilities include an accrual of audit fees.

9. Reclamation obligation

The reclamation obligation is related to the Candelaria Project and is estimated based upon the present value of expected cash flows using estimates of inflation and risk-free discount rate. The undiscounted amount of cash flows required to settle the reclamation obligation was estimated at US$2,491,757 as at September 30, 2026 (December 31, 2025 – US$2,491,757).

The key assumptions on which the provision estimates were based on at September 30, 2026 and December 31, 2025 were:

- Expected timing of the cash flows between 2043-2047 based on the expected life of the Candelaria Project
- An inflation rate of 2.00% (December 31, 2025: 2.00%)
- A discount rate of 8.85% (December 31 2025: 8.85%)

The following table provides a summary of changes in the reclamation obligation:

	Reclamation Obligation

14. Financial instruments

Classification of financial instruments

The Company's financial instruments consist of cash, receivables, reclamation deposits, marketable securities, and accounts payable and accrued liabilities. The Company classifies its cash, receivables and reclamation deposits as financial assets at amortized cost. The Company classifies its accounts payable and accrued liabilities as financial liabilities at amortized cost. The Company classifies its marketable securities as FVTPL. There have been no changes to the classification of financial instruments since December 31, 2025.

Fair value

Financial instrument disclosures establish a fair value hierarchy that requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The Company primarily applies the market approach for recurring fair value measurements. This section describes three input levels that may be used to measure fair value:

14. Financial instruments (continued)

Fair value (continued)

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide information on an ongoing basis.

Level 2 – quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The fair value of cash, receivables, reclamation deposits and accounts payable and accrued liabilities approximates their carrying values. Marketable securities are measured at fair value using level 1 inputs.

Financial instruments risk management

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies. The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility.

The Company thoroughly examines the various financial instruments and risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include foreign currency risk, interest rate risk, credit risk, and liquidity risk. Where material, these risks are reviewed and monitored by the Board of Directors.

There have been no changes in any risk management policies since December 31, 2025.

15. Management of capital

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of and retention of its mineral properties. In the management of capital, the Company includes its components of shareholders' equity.

The capital structure of the Company consists of equity attributable to common shareholders, comprised of issued capital, reserves and deficit.

The Company maintains and adjusts its capital structure based on changes in economic conditions and the Company's planned requirements. The Company may adjust its capital structure by issuing new equity, issuing new debt, or acquiring or disposing of assets, and controlling the capital expenditures program. The Company is not subject to externally imposed capital requirements.

The Company does not have a source of revenue. As such, the Company is dependent on external financing to fund its activities. In order to pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

Management reviews its capital management policies on an ongoing basis. There were no changes in the Company's approach to capital management during the nine months ended September 30, 2026.
